Deadline for manuscript
submissions:

closed (30 April 2023)

Message from the Guest Editor

Organometallic chemistry plays a central role in various fields of science at the interface of organic and inorganic materials and main group metal chemistry. The bonding between metal and carbon atoms continues to serve as an inspiration to discover, characterize and apply new organometallic complexes and processes of significant importance to general research. In this Special Issue, we invite Featured Reviews that provide a survey of recent advances in the field. Submissions of comprehensive reviews, shorter targeted reviews, perspectives and spotlight reviews on any aspect of recent organometallic chemistry research are welcome.

an Open Access Journal by MDPI

Institute of Pharmaceutical
Biology and Phytochemistry,
University of Münster,
Corrensstrasse 48, D-48149
Münster, Germany

Message from the Editor-in-Chief

As the premier open access journal dedicated to experimental organic chemistry, and now in its 25th year of publication, the papers published in *Molecules* span from classical synthetic methodology to natural product isolation and characterization, as well as physicochemical studies and the applications of these molecules as pharmaceuticals, catalysts and novel materials. Pushing the boundaries of the discipline, we invite papers on multidisciplinary topics bridging biochemistry, biophysics and materials science, as well as timely reviews and topical issues on cutting edge fields in all these areas.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [MEDLINE](#), [PMC](#), [Reaxys](#), [CaPlus / SciFinder](#), [MarinLit](#), [AGRIS](#), and [other databases](#).

Journal Rank: JCR - Q2 (*Chemistry, Multidisciplinary*) / CiteScore - Q1 (*Chemistry (miscellaneous)*)
