Message from the Guest Editor

Dear Colleagues,

Peptides are compounds with a variety of biological properties that offer multiple applications. Since 1963, when solid-phase peptide synthesis (SPPS) was introduced by Merrifield, a great deal of effort has been expended on the development of this method. The biomedical applications of peptides are somewhat limited, due to their poor oral bioavailability, chemical instability, or low membrane permeability. However, thanks to the efforts of many scientific groups, many peptides are currently under clinical trials and some have been registered as drugs.

In view of the recent developments, research articles covering all areas of peptide chemistry are welcome for publication in this Special Issue of *Molecules*.

Message from the Editor-in-Chief

As the premier open access journal dedicated to experimental organic chemistry, and now in its 25th year of publication, the papers published in *Molecules* span from classical synthetic methodology to natural product isolation and characterization, as well as physicochemical studies and the applications of these molecules as pharmaceuticals, catalysts and novel materials. Pushing the boundaries of the discipline, we invite papers on multidisciplinary topics bridging biochemistry, biophysics and materials science, as well as timely reviews and topical issues on cutting edge fields in all these areas.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [MEDLINE](#), [PMC](#), [Reaxys](#), [CaPlus / SciFinder](#), [MarinLit](#), [AGRIS](#), and [other databases](#).

Journal Rank: JCR - Q2 (*Chemistry, Multidisciplinary*) / CiteScore - Q1 (*Chemistry (miscellaneous)*)
