Deadline for manuscript  
submissions:

**closed (30 July 2016)**

### Message from the Guest Editor

Dear Colleagues,

Pericyclic reactions are seminal processes in organic synthesis. They have long been utilised to form multiple bonds and stereocenters in a single operation, and have found application in the total synthesis of natural products and a multitude of other endeavours. This Special Issue will feature contributions from renowned international researchers in organic synthesis in which pericyclic reactions feature as key transformations.

Prof. Dr. Mark A. Rizzacasa

## Message from the Editor-in-Chief

As the premier open access journal dedicated to experimental organic chemistry, and now in its 25th year of publication, the papers published in *Molecules* span from classical synthetic methodology to natural product isolation and characterization, as well as physicochemical studies and the applications of these molecules as pharmaceuticals, catalysts and novel materials. Pushing the boundaries of the discipline, we invite papers on multidisciplinary topics bridging biochemistry, biophysics and materials science, as well as timely reviews and topical issues on cutting edge fields in all these areas.

## Author Benefits

**Open Access:** free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

**High Visibility:** indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [MEDLINE](#), [PMC](#), [Reaxys](#), [CaPlus / SciFinder](#), [MarinLit](#), [AGRIS](#), and [other databases](#).

**Journal Rank:** JCR - Q2 (*Chemistry, Multidisciplinary*) / CiteScore - Q1 (*Chemistry (miscellaneous)*)
