Message from the Guest Editors

Sample preparation is, and will always be, the most important step in chemical analysis. Analytical chemists are invited to share their experience in the field and report on the recent advances in sample preparation approaches.

- sample preparation
- sample pretreatment
- extraction techniques
- microextraction techniques
- green analytical chemistry
- miniaturization
- automated techniques

Message from the Editor-in-Chief

As the premier open access journal dedicated to experimental organic chemistry, and now in its 25th year of publication, the papers published in *Molecules* span from classical synthetic methodology to natural product isolation and characterization, as well as physicochemical studies and the applications of these molecules as pharmaceuticals, catalysts and novel materials. Pushing the boundaries of the discipline, we invite papers on multidisciplinary topics bridging biochemistry, biophysics and materials science, as well as timely reviews and topical issues on cutting edge fields in all these areas.
