Message from the Guest Editor

Dear Colleagues,

Nanomedicine based on self-assembled nanocarriers has attracted attention to the development of effective drug and gene delivery. Nanomedicine with multi-functionalities for a drug and gene delivery are designed using polymer micelles, vesicles, and liposomes through the synthesis of self-assembled polymers and lipid molecules. This Special Issue aims to provide a forum for the dissemination of the latest information on nanomedicine, including widely from nanocarrier design to in vivo experiments.

Message from the Editor-in-Chief

As the premier open access journal dedicated to experimental organic chemistry, and now in its 25th year of publication, the papers published in *Molecules* span from classical synthetic methodology to natural product isolation and characterization, as well as physicochemical studies and the applications of these molecules as pharmaceuticals, catalysts and novel materials. Pushing the boundaries of the discipline, we invite papers on multidisciplinary topics bridging biochemistry, biophysics and materials science, as well as timely reviews and topical issues on cutting edge fields in all these areas.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [MEDLINE](#), [PMC](#), [Reaxys](#), [CaPlus / SciFinder](#), [MarinLit](#), [AGRIS](#), and [other databases](#).

Journal Rank: JCR - Q2 (*Chemistry, Multidisciplinary*) / CiteScore - Q1 (*Chemistry (miscellaneous)*)
