Deadline for manuscript  
submissions:

**closed (31 July 2012)**

### Message from the Guest Editor

Dear Colleagues,

Stereoselective synthesis, also known as asymmetric synthesis, is a very wide concept, that includes any form of synthesis using reactions in which at least one element of chirality is formed in a substrate molecule, producing stereoisomeric, either enantio- or diastereoisomeric products, in unequal amounts. This special issue of *Molecules* will consider any submissions associated with stereoselective syntheses in any form.

Prof. Dr. Marcelo D. Preite✉

## Message from the Editor-in-Chief

As the premier open access journal dedicated to experimental organic chemistry, and now in its 25th year of publication, the papers published in *Molecules* span from classical synthetic methodology to natural product isolation and characterization, as well as physicochemical studies and the applications of these molecules as pharmaceuticals, catalysts and novel materials. Pushing the boundaries of the discipline, we invite papers on multidisciplinary topics bridging biochemistry, biophysics and materials science, as well as timely reviews and topical issues on cutting edge fields in all these areas.

## Author Benefits

**Open Access:** free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

**High Visibility:** indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [MEDLINE](#), [PMC](#), [Reaxys](#), [CaPlus / SciFinder](#), [MarinLit](#), [AGRIS](#), and [other databases](#).

**Journal Rank:** JCR - Q2 (*Chemistry, Multidisciplinary*) / CiteScore - Q1 (*Chemistry (miscellaneous)*)
