Message from the Guest Editors

Dear Colleagues,

Food authenticity involves the confirmation of a stated speciation as true. Determining the authenticity of foods certifies that the food product is in accordance with force rules, standards, and with the inscriptions of its label. Thus, the development of novel analytical methodologies to guarantee the safety, quality, and traceability of foods in compliance with legislation is critical. This Special Issue invites manuscripts that develop novel analytical methodologies for food fingerprinting via the introduction of modern sample preparation techniques, detection, and determination, followed by sophisticated data processing workflows and comprehensive data mining and predictive modeling tools

Message from the Editor-in-Chief

Methods and Protocols (ISSN 2409-9279) is an open access journal devoted to the publication of new procedural approaches and cutting-edge methodological developments. The ultimate objective of this new forum of scientific communication is to provide researchers with an indispensable tool, enabling better use of the latest scientific technologies. With a broad and totally interdisciplinary focus, *Methods and Protocols* was established with the objective of facilitating cross-fertilization and cross-talk in the scientific arena. Methods and protocols in Life Sciences, Chemistry, Biomedical Sciences, Engineering, and in their intersections such as Biotechnology and Nanotechnology will constitute the core of the journal. However, we anticipate that other fundamental disciplines such as Physics or Geology will be rapidly incorporated.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, ESCI (Web of Science), PubMed, PMC, CAPlus / SciFinder, and other databases.

Journal Rank: CiteScore - Q2 (Biochemistry, Genetics and Molecular Biology (miscellaneous))
