Message from the Guest Editors

Dear Colleagues,

The global nanoparticle market size was estimated at about USD 1 billion in 2018, and according to various agencies, it is expected to register a CAGR of 10.3% over the forecast period. This notable growth is due mainly to the wide field of applications of nanotechnology, since it serves as a revolutionary and beneficial technology across medicine, transportation, agriculture, energy, materials, manufacturing, and the food sectors. In this framework, process intensification may play a fundamental role to favor the industrialization of nanoparticle production processes, usually carried out by lab-scale or pilot-scale equipment. The intensification of classical production processes, usually conducted batchwise, has becoming the main research field of various scholars and companies, considering the growing demand for nanoparticles in the global market [...]

Message from the Editor-in-Chief

Nanoscience and nanotechnology are exciting fields of research and development, with wide applications to electronic, optical, and magnetic devices, biology, medicine, energy, and defense. At the heart of these fields are the synthesis, characterization, modeling, and applications of new materials with lower nanometer-scale dimensions, which we call “nanomaterials”. These materials can exhibit unusual mesoscopic properties and include nanoparticles, coatings and thin films, metal-organic frameworks, membranes, nano-alloys, quantum dots, self-assemblies, 2D materials such as graphene, and nanotubes. Our journal, *Nanomaterials*, has the goal of publishing the highest quality papers on all aspects of nanomaterial science to an interdisciplinary scientific audience. All of our articles are published with rigorous refereeing and open access.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [PMC](#), [CAPus / SciFinder](#), [Inspecc](#), and [other databases](#).

Journal Rank: JCR - Q1 (*Physics, Applied*) / CiteScore - Q1 (*General Chemical Engineering*)
