College of Health Sciences, Point
Loma Nazarene University, San
Diego, CA 92106, USA

Message from the Collection Editors

Dear Colleagues,

Plant-based diets provide well-established physical and environmental health benefits including aiding in the prevention and management of chronic diseases. In addition to health benefits, a plant-based diet may provide performance-enhancing effects for various types of exercise due to high carbohydrate levels and the high concentration of antioxidants and phytochemicals typically found in a plant-based diet.

The aim of this Collection “Plant-Based Diets in Sports Nutrition and Performance” is to summarize the current state of the research concerning the implications of a plant-based diet for health and exercise performance. This includes research addressing protein and micronutrient adequacy, dietary fat and nutrition education of plant-based athletes. Contributions may include original articles and reviews on plant-based dietary patterns and their hypothesised ability to modulate sport and exercise performance, and sport supplements that could interest plant-based athletes.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, PubAg, AGRIS, and other databases.

Journal Rank: JCR - Q1 (*Nutrition & Dietetics*) / CiteScore - Q1 (*Nutrition and Dietetics*)

Message from the Editorial Board

Nutrients is an on-line open access journal that was first published in 2009. *Nutrients* adheres to rigorous peer-review and editorial processes and publishes only high quality manuscripts that address important issues related to the impacts of nutrients on human health. The Impact Factor of *Nutrients* has risen rapidly since its establishment and it is now ranked in the first quartile of journals publishing in the field of nutrition and dietetics research.
