Deadline for manuscript submissions:

25 July 2024

Message from the Guest Editor

Dear Colleagues,

As a new and old health promoter, probiotics and prebiotics play a key role in improving allergies, obesity, inflammatory bowel disease, cancer, mental illness, and other diseases partly via regulating immunity. Probiotics and prebiotics interventions are widely accepted due to their safety and effectiveness.

In this Special Issue, we welcome submissions including high-quality original research articles, clinical studies, and reviews that contribute innovative knowledge to understanding probiotics and prebiotics in host health. This particular focus includes the role of probiotics and prebiotics in health management, disease prevention, disease, and treatment/adjuvant therapy, especially for papers with a depth mechanism and/or those supported by clinical data.

Prof. Dr. Tingtao Chen
