closed (25 March 2024)

Message from the Guest Editor

Dear Colleagues,

There is a close relationship between dietary fat and our body shape, and it is becoming increasingly clear that the composition of dietary fatty acids and the intake of certain functional fatty acids have an impact on obesity and metabolic disorders. In understanding the functions of fatty acids, it is important to clarify their metabolic changes and interactions with biological molecules, and preliminarily, information obtained through comprehensive analysis by metabolomics and lipidomics can also contribute greatly to future research progress. This Special Issue of *Nutrients* entitled “Effects of Dietary Fatty Acid on Obesity” welcomes original research including preliminary studies and reviews of the literature concerning this important topic.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, PubAg, AGRIS, and other databases.

Journal Rank: JCR - Q1 (Nutrition and Dietetics) / CiteScore - Q1 (Nutrition and Dietetics)

Message from the Editorial Board

Nutrients is an on-line open access journal that was first published in 2009. *Nutrients* adheres to rigorous peer-review and editorial processes and publishes only high quality manuscripts that address important issues related to the impacts of nutrients on human health. The Impact Factor of *Nutrients* has risen rapidly since its establishment and it is now ranked in the first quartile of journals publishing in the field of nutrition and dietetics research.
