### **Message from the Guest Editors**

Dear Colleagues

Polyphenols have been linked to positive effects on health. Resveratrol, present in some foods, shows positive effects on physiological and biochemical processes, representing a potential tool for the prevention or treatment of highly prevalent diseases. Some effects have been observed only in pre-clinical studies so far. Thus, new knowledge is needed for the development of novel functional foods/nutraceuticals, incorporating resveratrol, suitable for preventing or treating diseases such as cancer, cardiovascular disease, obesity, dyslipidemia, insulin resistance, diabetes, liver disease...

It is our pleasure to invite researchers to provide manuscripts, original research or updated reviews, for a Special Issue entitled "Benefits of Resveratrol Supplementation". Manuscripts with recent advances on resveratrol-mediated effects on health, its mechanisms of action, dose-response pattern, bioavailability, combinatorial strategies, population target or health claims are welcome.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, PubAg, AGRIS, and other databases.

**Journal Rank:** JCR - Q1 (*Nutrition & Dietetics*) / CiteScore - Q1 (*Nutrition and Dietetics*)
