submissions:

closed (31 July 2020)

Message from the Guest Editors

Dear Colleagues,

Food labels are a tool to promote public health by providing information which allows consumers to make informed dietary choices. At the same time, food labels may represent a marketing tool and may influence consumers' perception of food quality.

This Special Issue welcomes original research and reviews of literature focusing on:

- The analysis of the nutrient profile of products with different characteristics reported on the food labels (including but not limited to nutrition and health claims, organic, gluten-free);
- The nutrient profile underlying FOP nutrition labels and their graphical design in different countries;
- The consumers' perception, knowledge and understanding of the information made on food;
- The impact of information on food labeling (e.g., front-of-pack information, serving size) on consumers' willingness to pay and food choice;
- The attitudes, beliefs, perceptions, behavioral, and socioeconomic determinants regarding the use of food labels.

Sciences, University of
Connecticut, Storrs, CT 06269,
USA

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, PubAg, AGRIS, and other databases.

Journal Rank: JCR - Q1 (*Nutrition & Dietetics*) / CiteScore - Q1 (*Nutrition and Dietetics*)

Message from the Editorial Board

Nutrients is an on-line open access journal that was first published in 2009. *Nutrients* adheres to rigorous peer-review and editorial processes and publishes only high quality manuscripts that address important issues related to the impacts of nutrients on human health. The Impact Factor of *Nutrients* has risen rapidly since its establishment and it is now ranked in the first quartile of journals publishing in the field of nutrition and dietetics research.
