submissions:

**closed (31 August 2018)**

### Message from the Guest Editors

Dear Colleagues,

A growing body of scientific evidence supports an important role for gut microbes. There are significant gaps relating to the impacts of diet, genes and the environment on the gut microbiome. Influences on gut microbes during establishment of microbial population profiles during early infancy, and potentially any time thereafter, could lead to susceptibilities to some diseases through development of less than ideal microbial populations. Microbial dysbioses have not only been linked to gastrointestinal diseases but also to a wide range of conditions affecting other parts of the body, and could contribute to obesity and associated metabolic complications. We invite submissions which use methods to extend our understanding of the role of the gut microbiome and/or their products in human health, and especially submissions which also examine the influence of nutrition. Studies using *in vitro* systems, animal experimentation and human analysis or intervention are welcome, as are submissions describing the effects of probiotics, pre-

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, PubAg, AGRIS, and other databases.

**Journal Rank:** JCR - Q1 (Nutrition and Dietetics) / CiteScore - Q1 (Nutrition and Dietetics)

## Message from the Editorial Board

*Nutrients* is an on-line open access journal that was first published in 2009. *Nutrients* adheres to rigorous peer-review and editorial processes and publishes only high quality manuscripts that address important issues related to the impacts of nutrients on human health. The Impact Factor of *Nutrients* has risen rapidly since its establishment and it is now ranked in the first quartile of journals publishing in the field of nutrition and dietetics research.
