Message from the Guest Editor

Dear Colleagues,

Nutraceuticals and functional foods are attracting attention for their potential preventive and therapeutic effects. Over the past few decades, enormous efforts have been devoted to exploring this exciting new topic, and a large body of preclinical and clinical evidence has been collected. In fact, it has been established that adherence to a healthy diet or a diet supplemented with micronutrients (vitamins or minerals) or products isolated from vegetables (including phytosterols or flavonoids) may help in health and the prevention of chronic diseases.

Currently, many components of plants are well recognized for their beneficial health properties, but many components are still awaiting identification and functional characterization for their optimal use by the food and pharmaceutical industries in the development of new and highly effective medicines. Thus, despite much work that has been conducted, there is clearly room for research in this hot area at the basic, clinical, and epidemiological levels.

This Special Issue calls for original research as well as review articles and meta-analyses that consider a non-traditional use of nutraceuticals.

Sciences, University of
Connecticut, Storrs, CT 06269,
USA

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, PubAg, AGRIS, and other databases.

Journal Rank: JCR - Q1 (*Nutrition & Dietetics*) / CiteScore - Q1 (*Nutrition and Dietetics*)

Message from the Editorial Board

Nutrients is an on-line open access journal that was first published in 2009. *Nutrients* adheres to rigorous peer-review and editorial processes and publishes only high quality manuscripts that address important issues related to the impacts of nutrients on human health. The Impact Factor of *Nutrients* has risen rapidly since its establishment and it is now ranked in the first quartile of journals publishing in the field of nutrition and dietetics research.
