Studies, University of Regina,  
Regina, SK S4S 0A2, Canada

Deadline for manuscript  
submissions:

**closed (31 August 2012)**

### Message from the Guest Editor

Dear Colleagues,

The age-related decrease in muscle health is a main limiting factor for functional independence and longevity. Nutrient provision and physical activity are two key regulators of muscle function. Specifically, amino acids and dietary proteins influence muscle protein kinetics in response to endurance and weight-bearing exercise. This special issue will highlight emerging research on interactions between amino acids, dietary proteins, and exercise training that have potential to impact muscle health and biology.

Dr. Darren Candow

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, PubAg, AGRIS, and other databases.

**Journal Rank:** JCR - Q1 (*Nutrition & Dietetics*) / CiteScore - Q1 (*Nutrition and Dietetics*)

## Message from the Editorial Board

*Nutrients* is an on-line open access journal that was first published in 2009. *Nutrients* adheres to rigorous peer-review and editorial processes and publishes only high quality manuscripts that address important issues related to the impacts of nutrients on human health. The Impact Factor of *Nutrients* has risen rapidly since its establishment and it is now ranked in the first quartile of journals publishing in the field of nutrition and dietetics research.
