Sciences, University of Pisa, Viale  
delle Piagge 2, 56124 Pisa, Italy

Deadline for manuscript  
submissions:

**closed (1 December 2021)**

### Message from the Guest Editor

The understanding of parasite epidemiology, diagnosis, pathology, host-pathogen interaction, zoonotic, and spillover potential with far-reaching significance also for human medicine, is fundamental for planning effective measures for the control of parasitic diseases. In many cases, knowledge of parasites of some wild and exotic animals is very limited, while it is fundamental for wildlife conservation plans and to avoid the introduction of exotic parasites.

This Special Issue will collect original papers and/or review papers dealing with those aspects of parasitic diseases of wild, domestic, and exotic animals that can be relevant for animal and public health and welfare, economy, and conservation. Work exploring the implementation of the knowledge of parasites of wild and exotic animal species and all aspects useful for the control of parasitic diseases in wild, domestic, and exotic animals is also welcome.

We look forward to your valuable contributions !

an Open Access Journal by MDPI

## Message from the Editor-in-Chief

The worldwide impact of infectious disease is incalculable. The consequences for human health in terms of morbidity and mortality are obvious and vast but, when infections of animals and plants are also taken into account, it is hard to imagine any other disease that has such a significant impact on our lives—on healthcare systems, on agriculture and on world economics. *Pathogens* is proud to continue to serve the international community by publishing high quality studies that further our understanding of infection and have meaningful consequences for disease intervention.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, PubAg, CaPlus / SciFinder, AGRIS, and other databases.

**Journal Rank:** JCR - Q2 (*Microbiology*) / CiteScore - Q2 (*General Immunology and Microbiology*)
