### Message from the Guest Editors

Dear Colleagues,

Antibiotics are central to healthcare, society and medicinal chemistry and the field is constantly evolving, in tandem with the bacteria that they aim to eradicate. The constant challenges facing us still pertain to the effectiveness of these agents in disease treatment and management to lessen the heavy burden on society. As a leading scientist in this area, we invite you to contribute an article, review or communication to this special edition on “Antibiotics” with specific relevance to the antibiotics field. Specific topics include, but are not limited to: prevention, new therapeutic agents, drug discovery, diagnostics and drug resistance.

Dr. Mark C. Bagley
