Message from the Guest Editors

Dear Colleagues,

This Special Issue serves to highlight and capture the latest research on the 3D printing technology applied to the preparation of pediatric orodispersible dosage forms, which is focused on meeting the need for personalized or industrial medicines to treat this vulnerable population.

We invite articles on all 3D technologies that can have an important role in the elaboration of orodispersable formulations, taking into account the fact that the quality of the final product must be guaranteed. It is for this reason that this topic must be supported by quality control strategies, such as process analytical technologies or multivariate statistical process control.

Submissions of original research articles and reviews in this rapidly expanding field of research are welcome.

Dr. Ana Santoveña-Estévez

Dr. Javier Suárez González

Message from the Editor-in-Chief

Pharmaceutics (ISSN 1999-4923) is an online open access journal on the science and technology of pharmaceutics and biopharmaceutics. The scientific community, the wider community and the general public have unlimited and free access to the content as soon as a paper is published; this open access to your research ensures your findings are shared with the widest possible audience. Please consider publishing your impressive work in this high quality journal. We would be pleased to welcome you as one of our authors.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (*Pharmacology & Pharmacy*) / CiteScore - Q1 (*Pharmaceutical Science*)
