### Message from the Guest Editor

Dear Colleagues,

Gene therapy is defined as introducing genetic information for therapeutic purposes. Besides conventional usage, such as protein-replacement therapies, in many medical fields, the applications have been widely expanding from vaccination against infectious diseases or cancer, and “gene” editing using the cutting-edge technologies of ZFN, TALENs, and CRISPR–Cas9. Cell therapy combined with ex vivo gene introduction is also an exciting field. The Special Issue of *Pharmaceutics* on “New paradigm of gene therapy” will address diverse areas related to gene therapy, including nucleic acids preparation (DNA, RNA), delivery systems, administration technique, and proof-of-concept studies using animal models. Original research papers or review articles on any of these aspects are welcomed for this Special Issue.

Keiji Itaka

## Message from the Editor-in-Chief

*Pharmaceutics* (ISSN 1999-4923) is an online open access journal on the science and technology of pharmaceutics and biopharmaceutics. The scientific community, the wider community and the general public have unlimited and free access to the content as soon as a paper is published; this open access to your research ensures your findings are shared with the widest possible audience. Please consider publishing your impressive work in this high quality journal. We would be pleased to welcome you as one of our authors.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

**Journal Rank:** JCR - Q1 (*Pharmacology & Pharmacy*) / CiteScore - Q1 (*Pharmaceutical Science*)
