Message from the Guest Editors

Polysaccharides have been recognized as one of the most interesting classes of biomaterials for the development of highly effective delivery systems for the treatment of a plethora of human disorders, including cancer, infections, inflammations, and degenerative diseases. This interest is related to their superior chemical features, well matched with the ultimate aim of a drug delivery system (DDS). The main objective of DDS, indeed, is to optimize the delivery of a biologically active agent for improving the systemic circulation controlling, at the same time, the pharmacokinetics, pharmacodynamics, non-immunogenicity, and non-specific toxicity.

Furthermore, polysaccharides possess a wide chemical versatility for tailored functionalization processes. The high functional versatility and structural diversity within such classes of biomaterials, together with the abundance of chemical groups (e.g., amine, carboxyl, carbonyl, and hydroxyl groups) offer many options for the development of different delivery vehicles, including hydrogels, micro- and nano- particles, vesicles, polymeric conjugates, hybrid materials, and others.

an Open Access Journal by MDPI

Editor-in-Chief

Prof. Dr. Patrick J. Sinko

Department of Pharmaceutics,

Pharmacy, Rutgers University,
Piscataway, NJ 08854, USA

Message from the Editor-in-Chief

Pharmaceutics (ISSN 1999-4923) is an online open access journal on the science and technology of pharmaceutics and biopharmaceutics. The scientific community, the wider community and the general public have unlimited and free access to the content as soon as a paper is published; this open access to your research ensures your findings are shared with the widest possible audience. Please consider publishing your impressive work in this high quality journal. We would be pleased to welcome you as one of our authors.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (*Pharmacology & Pharmacy*) / CiteScore - Q1 (*Pharmaceutical Science*)
