Message from the Guest Editors

This Special Issue would like to invite authors from across the world to contribute original research and review articles, both narrative and systematic, short communications, editorials, and commentaries. The special interest of this issue is on identifying and representing the unique role of various health care providers and patients themselves in improving medication safety. The impact and role of health care technologies, as well as information sources on medication safety, are of additional interest as part of this themed issue. We welcome submission of manuscripts which deal with a broad range of topics, such as: Practical approaches or interventions which influence/improve medication safety; Unique role of providers; pharmacists, clinicians, nurses and other health care providers in medication safety; Multidisciplinary approaches/systems to enhance medication safety; Educational initiatives to improve medication safety; Influence of sharing of information on medication safety on the patients and public; Various Information sources and its exclusive influence on medication safety in real life; Role of technology at various stages of medication safety in clinical practice

Special Issue
