

## Advances in Essential Oils from Medicinal Plants

Guest Editors:

**Prof. Dr. Milen I. Georgiev**

**Dr. Stanislava Ivanova**

**Dr. Cédric Delattre**

Deadline for manuscript  
submissions:

**10 June 2024**

### Message from the Guest Editors

Essential oils are sources of valuable compounds of a large variety of traditional applications. The huge diversity of terpenes, exceeding more than 30,000 compounds, attracts attention to essential oils, in the component composition of which they are principal constituents. This constituent variability also determines a wide range of pharmacological activities, including antiseptic, revulsive, cooling, local anesthetic, anti-inflammatory, expectorant, appetite-stimulating, cholagogue and choleric, diuretic, and sedative, in dermatological and inhalation preparations, in aromatherapy, as flavoring agents in pharmaceutical manufacture, in perfumery and cosmetics, in the manufacture of soaps and detergents, and in the food (spices), alcohol, and tobacco industries. Of particular interest for this Special Issue are essential oils from endemic plants.

Submissions are invited on related topics that include, but are not limited to:

- The chemical analysis of essential oils obtained from endemic plants;
- The histochemical analysis of essential oil-bearing plants;
- The biological activity of essential oils;
- Essential oils as a "green" alternative of pesticides.

## Message from the Editor-in-Chief

*Plants* is an open access journal which provides an advanced forum for research findings in areas related to plant function, its physiology, biology, taxonomy, stresses, and its interactions with other organisms. It publishes original research articles, reviews, reports, conference proceedings (peer reviewed full articles) and communications. In original research papers, it is important that full experimental details are provided. We also encourage timely reviews and commentaries on topics of interest to the plant research community.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, PMC, PubAg, AGRIS, CAPlus / SciFinder, and other databases.

**Journal Rank:** JCR - Q1 (*Plant Sciences*) / CiteScore - Q1 (*Plant Science*)
