Message from the Guest Editors

Dear Colleagues,

We are pleased to announce that a forthcoming Special Issue titled *Taxonomy, Biodiversity and Ecology of Mediterranean Plants* will be published in the journal *Plants*. The diversity and richness of plants in the Mediterranean area is amazing. At the same time, our knowledge on plant biodiversity is still significantly insufficient. We are now living in times of dramatic environmental changes triggered by human activities and climate changes. An increasing human population is accelerating biodiversity loss. In this context, work that seeks to understand the ecological and dynamic mechanisms that drive plant diversity is important to reverse the movement towards biodiversity loss. This Special Issue provides an exciting opportunity to combine and synthesize recent research in taxonomy, biodiversity and ecology to understand or promote the maintenance of plant diversity in the Mediterranean area.

Message from the Editor-in-Chief

Plants is an open access journal which provides an advanced forum for research findings in areas related to plant function, its physiology, biology, taxonomy, stresses, and its interactions with other organisms. It publishes original research articles, reviews, reports, conference proceedings (peer reviewed full articles) and communications. In original research papers, it is important that full experimental details are provided. We also encourage timely reviews and commentaries on topics of interest to the plant research community.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, PubAg, AGRIS, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (*Plant Sciences*) / CiteScore - Q1 (*Plant Science*)
