# **Recycling and Reuse of Fiber Reinforced Polymer Wastes**

Guest Editors:

Dr. Shishun Zhang

Prof. Dr. Xin Wang

Prof. Dr. Yingwu Zhou

### Message from the Guest Editors

The shortage of raw construction materials has been one of the most critical obstructions that hinders the sustainable development of the construction industry. The use of sustainable concrete helps to make the step forward towards achieving the carbon neutrality goal and helps to provide an alternative to mitigate the negative effects caused by a shortage of raw materials. As a result, it is of great significance to develop sustainable concrete using recycled wastes (including but not limited to fiberreinforced polymer (FRP) wastes) as coarse aggregates.

Deadline for manuscript submissions: closed (15 June 2023)

### Message from the Editor-in-Chief

Since its foundation in 2009, *Polymers* has developed into an internationally renowned, extremely successful open access journal. The editorial team and the editorial board dedicatedly combine open-access publishing and highquality rigorous peer reviewing. The performance of the journal has proven this strategy to be well-suited and highly successful. This is reflected in the increasing impact factor of *Polymers*, the most recent one being 5.0.

I would like to invite you to contribute to the success of the journal by sending us your high quality research papers. We would be pleased to welcome you as one of our authors.

# **Author Benefits**

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), Ei Compendex, PubMed, PMC, FSTA, CAPlus / SciFinder, Inspec, and other databases.

Journal Rank: JCR - Q1 (Polymer Science) / CiteScore - Q1 (Polymers and Plastics)
