Message from the Guest Editors

This topic encompasses enhanced heat transfer and fluid flow in natural and forced convection of liquids and gases, conduction and radiation heat transfer as well as boiling and condensation.

A variety of enhancement techniques for heat transfer and fluid flow are being researched to improve the thermal and hydraulic performance of heat exchangers, heat pumps, turbomachinery, HVAC&R components, renewable energy systems, internal combustion engines, and energy conversion processes.

These enhancement techniques include but are not limited to improved geometries and shapes, extended surfaces, active and passive fluid flow control, microscale and nanoscale heat transfer and fluid flow, nanofluids, and multiphase flow.

This Special Issue is open for original research articles that use experimental, theoretical, or computational approaches to the study of heat transfer and fluid flow enhancement. Review articles about the latest developments and research efforts in this field are also welcome.

an Open Access Journal by MDPI

Editor-in-Chief

Department of Drug Science and
Technology, University of Turin,
Via P. Giuria 9, 10125 Turin, Italy

Message from the Editor-in-Chief

Processes (ISSN 2227-9717) provides an advanced forum for process/system-related research in chemistry, biology, material, energy, environment, food, pharmaceutical, manufacturing and allied engineering fields. The journal publishes regular research papers, communications, letters, short notes and reviews. Our aim is to encourage researchers to publish their experimental, theoretical and computational results in as much detail as necessary. There is no restriction on paper length or number of figures and tables.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, AGRIS, and other databases.

Journal Rank: JCR - Q2 (*Engineering, Chemical*) / CiteScore - Q2 (*Chemical Engineering (miscellaneous)*)
