Message from the Guest Editors

The present Special Issue proposal has the overall aim of developing a network around application research to facilitate SMEs to meet the challenge of Industry 4.0. Several targets will be addressed: (i) to define a system of growth based on sustainable development; (ii) to apply the fourth industrial revolution in all economic sectors, primarily in SMEs from industry to agriculture, always guaranteeing the best level of safety for work. In the latter sector, specific attention is paid even promoting energy efficiency and production improvement processes. Furthermore, with this Special Issue, another purpose is to identify best practice and strategies that all stakeholders must adopt. The role of policymakers is crucial for improving a suitable framework setting to support SMEs in Industry 4.0. The final purpose of the present Special Issue is to publish high-quality research contributions, addressing recent advances on systems, technologies, processes, and materials for SMEs. Original and high-quality research papers and review articles, which have not yet been published, or that are not currently under review by other journals or peer-reviewed conferences, are welcome.

an Open Access Journal by MDPI

Message from the Editor-in-Chief

You are invited to contribute either a research article or a comprehensive review for consideration and publication in *Processes*. *Processes* is published in open access format – research articles, reviews, and other content are released on the internet immediately after acceptance. The scientific community and the general public have unlimited, free access to the content. As an open access journal, *Processes* is supported by the authors and their institutes through the payment of article processing charges (APCs) for accepted papers. We would be pleased to welcome you as one of our authors.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, AGRIS, and other databases.

Journal Rank: CiteScore - Q2 (Chemical Engineering (miscellaneous))
