Systems Engineering,  
Department of Food Science and  
Technology, Nebraska Food for  
Health Center, University of  
Nebraska, 1400 R St, Lincoln, NE  
68588, USA

Deadline for manuscript  
submissions:

**closed (31 December 2017)**

### Message from the Guest Editor

Dear Colleagues,

Interest in engineering microbial communities for application in biotechnology and biomedical science has rapidly grown over the last decade. The design and control of microbial communities still remains a grand challenge, particularly due to the complexity of interspecies interactions that require mathematical modeling and computational analysis as essential tools.

This Special Issue calls for contributions across a broad range of areas that address recent computational and modeling developments for predicting species interactions and community dynamics and functions. Modeling frameworks of interest include metabolic network analysis, flux balance analysis, trait-based modeling, Lotka-Volterra modeling, evolutionary game theory, the cybernetic approach, functional gene-based modeling, thermodynamically-based modeling, individual-based modeling, integrative multiscale modeling, and other relevant approaches. We also welcome papers on data-driven inference of species interaction networks or gene co-expression networks in microbial communities.

## Editor-in-Chief

**Prof. Dr. Giancarlo Cravotto**

Department of Drug Science and  
Technology, University of Turin,  
Via P. Giuria 9, 10125 Turin, Italy

## Message from the Editor-in-Chief

*Processes* (ISSN 2227-9717) provides an advanced forum for process/system-related research in chemistry, biology, material, energy, environment, food, pharmaceutical, manufacturing and allied engineering fields. The journal publishes regular research papers, communications, letters, short notes and reviews. Our aim is to encourage researchers to publish their experimental, theoretical and computational results in as much detail as necessary. There is no restriction on paper length or number of figures and tables.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, AGRIS, and other databases.

**Journal Rank:** JCR - Q2 (*Engineering, Chemical*) / CiteScore - Q2 (*Chemical Engineering (miscellaneous)*)
