

An Open Access Journal

Editor-in-Chief

Prof. Dr. Michele Rosano

Message from the Editor-in-Chief

The potential to convert waste or previously unutilised material as reusable material will be of increasing importance in the 21st century. Recycling involves the conservation of material resources, energy and providing alternate materials/resources. *Recycling* is an online peer-reviewed international journal that publishes research papers, original articles and critical reviews in the areas of resource recycling, waste reutilisation, and waste management, policy, technology, regulations and assessments in order to encourage the uptake of recycled products, systems and waste management activities.

Author Benefits

Open Access

Unlimited and free access for readers

No Copyright Constraints

Retain copyright of your work and free use of your article

Thorough Peer-Review

Free Publication

No Article Processing Charges (APC) for well-prepared manuscripts submitted in 2016

No Space Constraints, No Extra Space or Color Charges

No restriction on the length of the papers, number of figures or colors

More Information about This Journal

Aims and Scope

Recycling (ISSN 2072-4292) provides an international online forum for studies about recycling, resource recovery and waste utilization across many industries including glass, paper, metal, plastic, textiles, and electronics. Our aim is to encourage scientists to publish experimental and theoretical research in the area of innovative processes, tools and methodologies relating to resource recycling. Articles about the evaluation of the recycling process, as well as interconnected issues with such as socio-cultural, political, economic, and legal considerations related to recycling, are also invited.

The scope of *Recycling* covers:

- Innovation processes, tools and methodologies for resource recycling across industry, including
- Waste processing technologies
- Circular economy
- Zero waste programs
- Recycling policies
- The economics of recycling
- Environmental and social impact of recycling
- Product (eco) design and recycling
