

remote sensing

To acknowledge our reviewers who so generously give their time to review papers submitted to *Remote Sensing*, on behalf of the Section Editor-in-Chief, Dr. Xiaofeng Li, we plan to dedicate an award to reviewers who prove their dedication, professionalism, and timeliness in reviewing manuscripts for *Remote Sensing*.

Although anonymous peer-reviewing is one of the cornerstones of publishing high quality comprehensive manuscripts for the advancement of science and engineering research, it is also often one of the most underappreciated of the many requests and demands made of subject experts. It is for this reason that the *Remote Sensing* editing team is extremely grateful to reviewers for the time, energy and dedication that they freely give to support their peers.
