submissions:

**closed (31 December 2020)**

### Message from the Guest Editors

Dear Colleagues,

Despite the many (r)evolutions in remote sensing technology over the past three decades, integration in archaeological practice and theory has sometimes been limited by frequent reliance on inherited tropes and practice without question. Rather than trying to review that situation with its origins in the 20th century, this volume seeks contributions that explore developing practice and theory in remote sensing archaeology for the 21st century.

Taking its scope as the use of remotely sensed data from either air- or spaceborne platforms for the benefit of archaeology and cultural heritage in general, authors are asked to submit papers that contribute to better defining the roles and contexts for why archaeologists may apply remote sensing techniques. In doing so, we hope that the collected papers will provide a focus on integrating remotely sensed data in archaeological practice (including a critical discussion on the role of remote sensing within such practice), addressing dislocations that may occur with theoretical concerns, and considering the future of this symbiosis.

## Message from the Editor-in-Chief

*Remote Sensing* is now a prominent international journal of repute in the world of remote sensing and spatial sciences, as a pioneer and pathfinder in open access format. It has highly accomplished global remote sensing scientists on the editorial board and a dedicated team of associate editors. The journal emphasizes quality and novelty and has a rigorous peer-review process. It is now one of the top remote sensing journals with a significant Impact Factor, and a goal to become the best journal in remote sensing in the coming years. I strongly recommend *Remote Sensing* for your best research publications for a fast dissemination of your research.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), Ei Compendex, PubAg, GeoRef, Astrophysics Data System, Inspec, dblp, and other databases.

**Journal Rank:** JCR - Q1 (*Geosciences, Multidisciplinary*) / CiteScore - Q1 (*General Earth and Planetary Sciences*)
