

Remote Sensing in Earth Surface Changes and Deformations Caused by Earthquake and Landslide (Third Edition)

Guest Editors:

Prof. Dr. Yi Wang

School of Geophysics and
Geomatics, China University of
Geosciences, Wuhan, China

Prof. Dr. Jun Hu

School of Geosciences and Info-
Physics, Central South University,
Changsha 410083, China

Dr. Weile Li

State Key Laboratory of
Geohazard Prevention and
Geoenvironment Protection,
Chengdu University of
Technology, Chengdu 610059,
China

Deadline for manuscript
submissions:

closed (31 January 2026)

Message from the Guest Editors

The aim of this Special Issue is to collect the most recent research on remote sensing applications in earth sciences. In particular, this Special Issue is dedicated to satellite, aerial, and terrestrial contactless devices for the observation and evaluation of earth surface changes and deformations caused by earthquakes and landslides, as well as new processing techniques related to remote sensing. We invite you to submit scientific, technological, or review articles focused on recent research within one or more of these topics:

- Detection of earth surface changes—multitemporal remote sensing;
- Mapping, modeling, and/or monitoring approaches in earth surface changes and deformations;
- Evaluating the earth surface status and creating novel solutions by integrating remote sensing and GIS techniques;
- Remote sensing of earthquake and landslide deformation monitoring.

an Open Access Journal by MDPI

Editors-in-Chief

Dr. Prasad S. Thenkabail

Senior Scientist (ST), U. S.
Geological Survey (USGS), USGS
Western Geographic Science
Center (WGSC), 2255, N. Gemini
Dr., Flagstaff, AZ 86001, USA

Prof. Dr. Dongdong Wang

Institute of Remote Sensing and
Geographic Information Systems,
Peking University, Beijing, China

Message from the Editorial Board

Remote Sensing is now a prominent international journal of repute in the world of remote sensing and spatial sciences, as a pioneer and pathfinder in open access format. It has highly accomplished global remote sensing scientists on the editorial board and a dedicated team of associate editors. The journal emphasizes quality and novelty and has a rigorous peer-review process. It is now one of the top remote sensing journals with a significant Impact Factor, and a goal to become the best journal in remote sensing in the coming years. I strongly recommend *Remote Sensing* for your best research publications for a fast dissemination of your research.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, PubAg, GeoRef, Astrophysics Data System, Inspec, dblp, and other databases.

Journal Rank: JCR - Q1 (Geosciences, Multidisciplinary) / CiteScore - Q1 (General Earth and Planetary Sciences)
