Deadline for manuscript  
submissions:

**closed (31 May 2023)**

### Message from the Guest Editors

We promote a special issue on "Monitoring Sustainable Development Goals" to support the achievement of SDGs and help the involved stakeholders. We encourage the submission of research papers that address the main topic of the special issue, including those based on the exploitation of geospatial data. Among other, we expect contributions that can cover multi-disciplinary aspects such as

- i) the preservation of the natural heritage,
- ii) the sustainable development,
- iii) the improvement of the social resilience to environmental changes,
- iv) the application and development of geospatial techniques for the monitoring of land-use/land-changes,
- v) the socio-economical impacts of global climate changes.

an Open Access Journal by MDPI

## Message from the Editor-in-Chief

*Remote Sensing* is now a prominent international journal of repute in the world of remote sensing and spatial sciences, as a pioneer and pathfinder in open access format. It has highly accomplished global remote sensing scientists on the editorial board and a dedicated team of associate editors. The journal emphasizes quality and novelty and has a rigorous peer-review process. It is now one of the top remote sensing journals with a significant Impact Factor, and a goal to become the best journal in remote sensing in the coming years. I strongly recommend *Remote Sensing* for your best research publications for a fast dissemination of your research.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), Ei Compendex, PubAg, GeoRef, Astrophysics Data System, Inspec, dblp, and other databases.

**Journal Rank:** JCR - Q1 (*Geosciences, Multidisciplinary*) / CiteScore - Q1 (*General Earth and Planetary Sciences*)
