

Remote Sensing of Vegetation Phenology

Guest Editors:

Dr. Fabienne Maignan

Dr. Natasha MacBean

Dr. Koen Hufkens

Dr. Soudani Kamel

Deadline for manuscript
submissions:

closed (30 April 2020)

Message from the Guest Editors

Dear Colleagues,

We are delighted to announce this Special Issue on the phenology of terrestrial vegetation. Phenology is the variation of recurrent key stages in the plant life cycle, linked to environmental changes. By extension, it also includes the mean seasonal cycle of relevant biophysical and biochemical quantities and their temporal and spatial changes. Remote sensing is a major player in this science, and we welcome all contributions related.

Dr. Fabienne Maignan

Dr. Natasha MacBean

Dr. Koen Hufkens

Prof. Kamel Soudani

Message from the Editor-in-Chief

Remote Sensing is now a prominent international journal of repute in the world of remote sensing and spatial sciences, as a pioneer and pathfinder in open access format. It has highly accomplished global remote sensing scientists on the editorial board and a dedicated team of associate editors. The journal emphasizes quality and novelty and has a rigorous peer-review process. It is now one of the top remote sensing journals with a significant Impact Factor, and a goal to become the best journal in remote sensing in the coming years. I strongly recommend *Remote Sensing* for your best research publications for a fast dissemination of your research.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, PubAg, GeoRef, Astrophysics Data System, Inspec, dblp, and other databases.

Journal Rank: JCR - Q1 (*Geosciences, Multidisciplinary*) / CiteScore - Q1 (*General Earth and Planetary Sciences*)
