

Cloud Infrastructure and Knowledge Management on Global Crop Monitoring

Guest Editors:

Dr. Xin Zhang

Division of Digital Agriculture, Key Laboratory of Digital Earth Science, Institute of Remote sensing and digital earth (RADI), Chinese Academy of Sciences (CAS)

Prof. Dr. Bingfang Wu

State Key Lab. of Remote Sensing Science, Aerospace Information Research Institute (AIR), Chinese Academy of Sciences (CAS), Beijing, China

Dr. Bettina Baruth

Joint Research Centre, Directorate for Sustainable Resources, Food Security, European Commission

Deadline for manuscript submissions:
closed (31 January 2019)

Message from the Guest Editors

Dear Colleagues,

The GEOGLAM 2018 Annual Meeting, focusing on topic of GEOGLAM Cloud Infrastructure and Knowledge Management, will bring together scientists and professionals from different countries to discuss how the cutting-edge technology of cloud infrastructure, big Earth data, and knowledge management can benefit and leverage GEOGLAM.

We are thus inviting authors and research teams to publish their recent work in the area of agricultural monitoring with cloud computing, and we are especially excited to receive contributions that report on good examples of methods that work. We invite papers on the following non-exhaustive list of topics:

- Cropland or crop type mapping at medium to high resolution.
- Approaches for automated crop field boundary detection
- Cloud based method or system in support of agricultural monitoring
- Ready to use data for agricultural monitoring
- Novel time series analytics, especially in the domains of cropland, crop type, crop calendar, crop successive, cropland use intensity, crop condition monitoring methods

an Open Access Journal by MDPI

Message from the Editor-in-Chief

Remote Sensing is now a prominent international journal of repute in the world of remote sensing and spatial sciences, as a pioneer and pathfinder in open access format. It has highly accomplished global remote sensing scientists on the editorial board and a dedicated team of associate editors. The journal emphasizes quality and novelty and has a rigorous peer-review process. It is now one of the top remote sensing journals with a significant Impact Factor, and a goal to become the best journal in remote sensing in the coming years. I strongly recommend *Remote Sensing* for your best research publications for a fast dissemination of your research.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, PubAg, GeoRef, Astrophysics Data System, Inspec, dblp, and other databases.

Journal Rank: JCR - Q1 (*Geosciences, Multidisciplinary*) / CiteScore - Q1 (*General Earth and Planetary Sciences*)
