

Remote Sensing for Agriculture, Hydrology, and Ecosystems Response to Climatic Variability

Guest Editors:

Dr. Won-Ho Nam

School of Social Safety and
Systems Engineering, Hankyong
National University, Anseong
17579, Republic of Korea

Prof. Dr. Xiang Zhang

National Engineering Research
Center of Geographic
Information System, School of
Geography and Information
Engineering, China University of
Geosciences (Wuhan), Lumo
Road 388, Hongshan District,
Wuhan, China

Deadline for manuscript
submissions:

closed (10 January 2024)

Message from the Guest Editors

This Special Issue welcomes novel research, review, and opinion pieces covering all related topics, including climatic variability, climate change, extreme events, water resources, soil moisture, hydrology, ecosystems, agriculture, evapotranspiration, crop yield, drought, irrigation water management, case studies from the field, and policy positions. This Special Issue is inviting manuscripts on the following topics:

- RS-based ecosystem modeling;
- RS-based crop evapotranspiration modeling;
- RS-based agro-hydrological modeling;
- RS-based assessments of crop water productivity and crop yield;
- RS-based drought assessment modeling;
- RS-based optimization of irrigation water and crop planting pattern;
- RS-based impact assessment of irrigation practices on ecosystems and environment;
- Other topics related to RS-based hydrology and water resources modeling.

an Open Access Journal by MDPI

Editor-in-Chief

Dr. Prasad S. Thenkabail

Senior Scientist (ST), U. S.
Geological Survey (USGS), USGS
Western Geographic Science
Center (WGSC), 2255, N. Gemini
Dr., Flagstaff, AZ 86001, USA

Message from the Editor-in-Chief

Remote Sensing is now a prominent international journal of repute in the world of remote sensing and spatial sciences, as a pioneer and pathfinder in open access format. It has highly accomplished global remote sensing scientists on the editorial board and a dedicated team of associate editors. The journal emphasizes quality and novelty and has a rigorous peer-review process. It is now one of the top remote sensing journals with a significant Impact Factor, and a goal to become the best journal in remote sensing in the coming years. I strongly recommend *Remote Sensing* for your best research publications for a fast dissemination of your research.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, PubAg, GeoRef, Astrophysics Data System, Inspec, dblp, and other databases.

Journal Rank: JCR - Q1 (*Geosciences, Multidisciplinary*) / CiteScore - Q1 (*General Earth and Planetary Sciences*)
