

Remote Sensing Techniques for Precision Forestry

Guest Editors:

Prof. Dr. Markus Holopainen

Prof. Dr. Juha Hyypä

Dr. Anttoni Jaakkola

Prof. Dr. Xinlian Liang

Dr. Xiaowei Yu

Deadline for manuscript
submissions:

closed (28 February 2019)

Message from the Guest Editors

As Guest Editors, we would like to dedicate this Special Issue to documenting these remote sensing techniques, especially using laser scanning, in a timely manner, allowing for future precision forestry. Well-prepared, unpublished submissions that address one or more of the following topics are solicited:

- New approaches, concepts, and applications, especially using laser scanning, for individual-tree-based forest inventory
- Feasibility studies with new sensors, ranging from hand-held to space-borne systems, and their applications to forestry
- Combined use of images and laser scanning data for forestry
- Comparison and benchmarking studies of using various sensors and/or processing methods for forestry
- Point cloud processing techniques to forest informatics
- Use of mobile and UAV, especially laser scanning, mapping techniques for forest inventory
- New precision forestry applications

an Open Access Journal by MDPI

Message from the Editor-in-Chief

Remote Sensing is now a prominent international journal of repute in the world of remote sensing and spatial sciences, as a pioneer and pathfinder in open access format. It has highly accomplished global remote sensing scientists on the editorial board and a dedicated team of associate editors. The journal emphasizes quality and novelty and has a rigorous peer-review process. It is now one of the top remote sensing journals with a significant Impact Factor, and a goal to become the best journal in remote sensing in the coming years. I strongly recommend *Remote Sensing* for your best research publications for a fast dissemination of your research.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, PubAg, GeoRef, Astrophysics Data System, Inspec, dblp, and other databases.

Journal Rank: JCR - Q1 (*Geosciences, Multidisciplinary*) / CiteScore - Q1 (*General Earth and Planetary Sciences*)
