submissions:  
**closed (31 January 2021)**

### Message from the Guest Editor

Dear Colleagues,

The rapid consumption and slow formation of fossil fuels, are imbalanced. Counteracting the imbalance of carbon cycle should involve CO<sub>2</sub> utilization and conversion. Scientists are proposing CO<sub>2</sub> utilization for closing the carbon cycle, but no evidence shows the option is the most convenient path. More efforts are required to assess all the ways to use CO<sub>2</sub> as a sustainable resource. The emission of CO<sub>2</sub> can be reduced by promising capture and conversion technologies. CO<sub>2</sub> can be converted into fuels, polymers, etc. Method for CO<sub>2</sub> reduction can be used in photosynthesis, electrochemical, hydrogenation, ect. The SI aims to results of cutting-edge research of carbon capture, utilization and storage, including CO<sub>2</sub> conversion to chemicals and fuels. The detailed results available from the journal are thought to be useful for researchers that will assess the net impacts of a CO<sub>2</sub> capture and utilization process, which can be obtained with LCA of CCU product and process. Papers include rigorous and transparent LCA are preferred.

an Open Access Journal by MDPI

## Message from the Editor-in-Chief

Responsible prosperity is underpinned by sustained access to resources. *Resources*, publishes excellent science and scholarship which transforms understanding, practices and policies for conserving all natural resources—from water, land and air; to plant and animal biodiversity; to minerals and energy and their interconnection across scales. Significantly, we invite high quality submissions from natural and social sciences.

Build impact from your research by submitting to *Resources*, an open-access journal connecting you with data, insights, ideas and evidence needed to shape a better world.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, ESCI (Web of Science), GeoRef, PubAg, AGRIS, RePEc, and other databases.

**Journal Rank:** CiteScore - Q1 (*Nature and Landscape Conservation*)
