

Nature-based Solutions for Urban Global Change Adaptation

Guest Editors:

Dr. Peter Cornelis Roebeling

Dr. Laura Wendling

Prof. Dr. Teresa Fidélis

Dr. Anna Stahlbrost

Deadline for manuscript
submissions:

closed (30 June 2021)

Message from the Guest Editors

Global change, including climate change, population growth and economic development, presents urgent challenges for cities in the 21st century. Cities must effectively manage urban and industrial expansion as well as challenges related to increased flood risk, water and air pollution, heat island effect, real estate devaluation and gentrification. There is emerging evidence and consensus that nature-based solutions (NBS), designed to bring more nature and natural features and processes to cities, can provide effective solutions to the multiple challenges facing cities. Here, we invite papers that address one or more of the following issues:

- i) multiple impacts, costs, (co-)benefits and economic viability of NBS across spatial, temporal and social scales;
- ii) effective co-creation processes that enable the visioning, design and implementation of NBS through engagement and participation of stakeholders throughout the different stages of co-creation;
- iii) particular spatial and water planning systems that enable the integration or fostering of NBS;
- iv) legal frameworks and institutional settings that constrain or enable the institutionalization, establishment and management of NBS.

Message from the Editor-in-Chief

Responsible prosperity is underpinned by sustained access to resources. *Resources*, publishes excellent science and scholarship which transforms understanding, practices and policies for conserving all natural resources—from water, land and air; to plant and animal biodiversity; to minerals and energy and their interconnection across scales. Significantly, we invite high quality submissions from natural and social sciences.

Build impact from your research by submitting to *Resources*, an open-access journal connecting you with data, insights, ideas and evidence needed to shape a better world.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, ESCI (Web of Science), GeoRef, PubAg, AGRIS, RePEc, and other databases.

Journal Rank: CiteScore - Q1 (*Nature and Landscape Conservation*)
