## Frontiers of Interdisciplinary Research on Financial and Insurance Risk Management

Guest Editors:

**Prof. Dr. Edward Furman**

Department of Mathematics and Statistics, York University,  
Toronto, ON M3J 1P3, Canada

**Dr. Yang Shen**

School of Risk and Actuarial Studies, University of New South Wales, Sydney, NSW, Australia

**Dr. Jianxi Su**

Department of Statistics, Purdue University, West Lafayette, IN, USA

Deadline for manuscript submissions:

**closed (1 July 2020)**

### Message from the Guest Editors

The stability and sustainability of Financial Services and the major players therein is a necessary condition for the macroeconomic growth of any country. Be it Basel (banking) or Solvency (insurance), the regulations constantly evolve in order to reflect real-world changes. One major innovation in the regulatory regimes, which is an aftermath of the recent financial crisis, is the notion of enterprise risk management (ERM). Remarkably, today, ERM is viewed by the public authorities as a key framework to deal with risks. ERM is quite different from its predecessors, in that it calls for managing various risks simultaneously at the enterprise level and employing a unified multifaceted framework.

Speaking of academia, ERM, which effortlessly crosses the boundaries of a number of distinct scholarly disciplines, invites a holistic and interdisciplinary approach to exploring risk management. With this Special Issue, we aim to share instances of successful interdisciplinary research that all focus on the problems of financial and insurance risk management. Both theoretical and empirical research contributions are welcome.

## Editor-in-Chief

### Prof. Dr. Steven Haberman

Faculty of Actuarial Science and  
Insurance, Bayes Business  
School, City University of London,  
106 Bunhill Row, London EC1Y  
8TZ, UK

## Message from the Editor-in-Chief

*Risks* is published in Open Access format – research articles, reviews and other content are released on the internet immediately after acceptance. Specifically, *Risks* welcomes contributions that

- contribute with insight, outlook, understanding and overview, no matter how simple they are;
- show creativity in pedagogical tricks and techniques;
- help the transfer of theoretical research to public and private application;
- show responsibility for societal impact.

The scientific community and the general public have unlimited free access to the content as soon as it is published.

## Author Benefits

**Open Access:** free for readers, with **article processing charges (APC)** paid by authors or their institutions.

**High visibility:** indexed within **Scopus**, **ESCI (Web of Science)**, **EconLit**, **EconBiz**, **RePEc**, and **other databases**.

**Journal Rank:** CiteScore - Q1 (*Economics, Econometrics and Finance (miscellaneous)*)
