Message from the Guest Editor

Dear Colleagues,

Since the publication of the seminal paper *Modeling and Forecasting U.S. Mortality* by Ronald Lee and Lawrence Carter in 1992, the field of mortality forecasting methods has seen an explosion of many interesting ideas and significant development. Some notable examples in the list are the incorporation of multi-age and time factors and cohort effect, the Cairns-Blake-Dowd model and its various extensions, frequentist and Bayesian estimations, allowance for mortality jumps and structural changes, different time series models and distributions, continuous mortality models, multi-population modelling, and more recently the use of explanatory factors and causes of death. There is a wide range of applications including demographic projections, social policy planning, the valuation of insurance and annuity products, hedging mortality and longevity risks, and pricing of mortality-linked and longevity-linked securities. This Special Issue aims to present state-of-the-art research papers on mortality forecasting methods and their potential applications. We welcome papers related but not limited to the topics and applications mentioned above.

Prof. Dr. Jackie Li

Message from the Editor-in-Chief

Risks is published in Open Access format – research articles, reviews and other content are released on the internet immediately after acceptance. Specifically, *Risks* welcomes contributions that

- contribute with insight, outlook, understanding and overview, no matter how simple they are;
- show creativity in pedagogical tricks and techniques;
- help the transfer of theoretical research to public and private application;
- show responsibility for societal impact.

The scientific community and the general public have unlimited free access to the content as soon as it is published.

Author Benefits

Open Access: free for readers, with **article processing charges (APC)** paid by authors or their institutions.

High visibility: indexed within **Scopus**, **ESCI (Web of Science)**, **EconLit**, **EconBiz**, **RePEc**, and **other databases**.

Journal Rank: CiteScore - Q1 (*Economics, Econometrics and Finance (miscellaneous)*)
