### Message from the Guest Editors

This Special Issue focuses on fostering improvements and new developments of technology in areas related to novel NDT&E techniques and approaches for characterization and real-time monitoring of aerospace composites, including use of advanced smart sensors and sensor networks, as well as strategies for data utilization for overall system safety and health management. We would like to invite original research articles, as well as review articles, that contain theoretical, analytical, and experimental investigations covering all aspects of NDT&E in aerospace composites and composite structures.
