Message from the Guest Editors

Dear Colleagues,

Temperature is a first class design concern in modern integrated circuits. The important increase in power densities associated to recent technology evolutions has led to the apparition of thermal gradients and hot spots during run time operation. Temperature impacts several circuit parameters such as speed, cooling budgets, reliability, power consumption, etc. All these effects result in a general worsening of the circuit reliability and wear out. In this context, the field of on-chip temperature monitoring has drawn the attention of the scientific community in the recent years and is the object of study of this special issue.

There is also a growing interest in using smart temperature sensors in hard-constrained applications. This is the case of biomedical devices, Internet of Things (IoT) nodes or wearables, that require temperature monitoring with reduced area and power consumption. [...]

Editor-in-Chief

Message from the Editor-in-Chief

Prof. Dr. Vittorio M. N. Passaro Dipartimento di Ingegneria Elettrica e dell'Informazione (Department of Electrical and Information Engineering), Politecnico di Bari, Via Edoardo Orabona n. 4, 70125 Bari, Italy

Sensors is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. *Sensors* organizes Special Issues devoted to specific sensing areas and applications each year.

Author Benefits

Open Access : free for readers, with article processing charges (APC) paid by authors or their institutions. **High Visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Ei Compendex, Inspec, Astrophysics Data System, and other databases. **Journal Rank:** JCR - Q2 (*Instruments & Instrumentation*) / CiteScore - Q1 (*Instrumentation*)
