Dielectric Sensing-Based Systems and Applications

Collection Editors:

Dr. Andrea Cataldo

Department of Innovation
Engineering (DII), University of
Salento, Via Monteroni, 73100
Lecce, Italy

Dr. Emanuele Piuze

Department of Information
Engineering, Electronics and
Telecommunications, Sapienza
University of Rome, 00184 Rome,
Italy

Dr. Agnieszka Szytłowska

Institute of Agrophysics, Polish
Academy of Sciences, ul.
Doświadczalna 4, 20-290 Lublin,
Poland

Message from the Collection Editors

Dielectric properties are fundamental characteristics of materials and, as such, they are often used to describe the “fingerprint” of a material in various applicative contexts.

This Topical Collection is open to research and review contributions related to 1) innovative methods and systems for the characterization of dielectric properties of materials and 2) innovative sensing and monitoring systems that resort to measurement of dielectric properties to retrieve other information on the system under test.

The list of topics includes but is not limited to:

- Enhancement of the accuracy of existing dielectric measurement systems;
- Development and validation of innovative dielectric permittivity models;
- Development of innovative sensing and monitoring systems based on dielectric measurements;
- Development of innovative probes or sensing elements for measuring dielectric properties.

Editor-in-Chief

Prof. Dr. Vittorio M. N. Passaro

Dipartimento di Ingegneria
Elettrica e dell'Informazione
(Department of Electrical and
Information Engineering),
Politecnico di Bari, Via Edoardo
Orabona n. 4, 70125 Bari, Italy

Message from the Editor-in-Chief

Sensors is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. *Sensors* organizes Special Issues devoted to specific sensing areas and applications each year.

Author Benefits

Open Access : free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [MEDLINE](#), [PMC](#), [Ei Compendex](#), [Inspec](#), [Astrophysics Data System](#), and [other databases](#).

Journal Rank: JCR - Q2 (*Instruments & Instrumentation*) / CiteScore - Q1 (*Instrumentation*)
