## G-Networks for Security, Low Energy Consumption and Quality of Service of the Internet of Things

Guest Editor:

**Prof. Dr. Erol Gelenbe**

Intelligent Systems and  
Networks, Imperial College  
London, London SW7 2AZ, UK

Deadline for manuscript  
submissions:

**closed (15 August 2018)**

### Message from the Guest Editor

Key probability models based on G-Networks and Diffusion Approximations allow the understanding, analysis and optimisation of the complex computer and communication systems that support the Internet of Things (IoT). Thus, this Special Issue will address the foundations of G-Networks for the analysis and control of computer and communication systems, and the applications of such models for Learning via the Random Neural Network including Deep Learning (for instance in security issues, intrusion and attack detection, as well as system management and control), for the design of energy aware systems including Energy Packet Networks, and for the dynamic control of systems. Many of these applications will be centred around the IoT, the modeling of wireless networks that use energy harvesting, the design of secure IOT gateways and IoT systems that are robust in situations where energy for operating the system is scarce.

### Keywords

- G-Networks and Random Neural Networks
- Diffusion Models
- Secure IoT Systems
- Energy and QoS Optimisation of the IoT and the Cloud
- Performance Analysis with G-Networks
- Cognitive Packet Networks to support the IoT

## Editor-in-Chief

### **Prof. Dr. Vittorio M. N. Passaro**

Dipartimento di Ingegneria  
Elettrica e dell'Informazione  
(Department of Electrical and  
Information Engineering),  
Politecnico di Bari, Via Edoardo  
Orabona n. 4, 70125 Bari, Italy

## Message from the Editor-in-Chief

*Sensors* is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. *Sensors* organizes Special Issues devoted to specific sensing areas and applications each year.

## Author Benefits

**Open Access :** free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

**High Visibility:** indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [MEDLINE](#), [PMC](#), [Ei Compendex](#), [Inspec](#), [Astrophysics Data System](#), and [other databases](#).

**Journal Rank:** JCR - Q2 (*Instruments & Instrumentation*) / CiteScore - Q1 (*Instrumentation*)
