### Message from the Guest Editors

This Special Issue, titled "Intelligent Sensors for Monitoring Physical Activities", intends to explore the scientific–technological frontier that underlies the optimal solution of the abovementioned problems, while, at the same time, involving the development and use of innovative sensors and smart methods for the interpretation of data and scenarios.

The main topics of this Special Issue include, but are not limited to, the following:

- biological signals and sensors;
- computational intelligence;
- digital signals and images processing;
- human physiology;
- machine learning;
- motion analysis;
- multimedia data analysis;
- neurological disorders;
- physical activities;
- positioning and depth sensors, sports, rural and mountain areas activities, and rehabilitation.
