Measurement Uncertainty in IoT Networks

Guest Editors:

Prof. Dr. Kostas Karatzas
Department of Mechanical Engineering, Aristotle University of Thessaloniki, Thessaloniki, Greece

Prof. Cezary Orłowski
Information Technology Management Department, WSB University in Gdańsk, Poland

Prof. Dr. Piotr Cofta
Faculty of Telecommunications, Computer Science and Electrical Engineering, Bydgoszcz University of Science and Technology, 85-796 Bydgoszcz, Poland

Deadline for manuscript submissions:
closed (31 December 2021)

Message from the Guest Editors

Measurement uncertainty is of particular importance in the Internet of Things networks due to the variety of devices and measurement methods. For this reason, uncertainty analysis becomes an important aspect of the assessment of the usefulness of these networks for measurements, the process of data enrichment, their initial processing and use for diagnosing and forecasting phenomena. Then this Special Issue will contain interesting results of uncertainty studies covering both the measurements themselves and their analysis and implementation processes. Topics of interest include but are not limited to thefollowing:

- Remote sensors
- Sensor networks
- Smart / Intelligent sensors
- Sensor devices
- Sensor technology and application
- Sensing principles
- Internet of Things
- Signal processing, data fusion and deep learning in sensor systems

Editor-in-Chief

Prof. Dr. Vittorio M. N. Passaro
Dipartimento di Ingegneria Elettrica e dell'Informazione (Department of Electrical and Information Engineering), Politecnico di Bari, Via Edoardo Orabona n. 4, 70125 Bari, Italy

Message from the Editor-in-Chief

Sensors is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. *Sensors* organizes Special Issues devoted to specific sensing areas and applications each year.

Author Benefits

Open Access : free for readers, with article processing charges (APC) paid by authors or their institutions.
High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Ei Compendex, Inspec, Astrophysics Data System, and other databases.
Journal Rank: JCR - Q2 (Instruments and Instrumentation) / CiteScore - Q1 (Instrumentation)
