Monitoring of Security Properties in IoT and Emerging Technologies

Guest Editors:

Dr. Antonio Muñoz

Ampliación Campus de Teatinos, Universidad de Málaga, 29071 Málaga, Spain

Prof. Dr. Eduardo B. Fernandez

Department of Computer and Electrical Engineering and Computer Science, Florida Atlantic University, 777 Glades Rd., Boca Raton, FL 33431, USA

Prof. Dr. Haris Mouratidis

School of Computer Science and Electronic Engineering, University of Essex, Colchester CO4 3SO, UK

Deadline for manuscript submissions:

closed (31 August 2021)

Message from the Guest Editors

The recent advances in technologies such as cloud computing, IoT, edge computing, and fog computing are transforming the way in which large-scale computations are performed. This has introduced improvements in terms of scalability for clouds, and in terms of permanent connection and user-centric computation for IoT, edge, and pervasive computing. However, the incursion of these technologies entails the introduction of new challenges regarding security and privacy. Monitoring of security properties in each of these technologies implies tailoring solutions according to particular features of baseline technology.

The Issue will focus on high-quality research and state-ofthe-art research paradigms on monitoring security properties in cloud, IoT, edge, and fog computing.

Subject Coverage

Suitable topics include but are not limited to the following:
Monitoring of security properties in clouds
Monitoring of security properties in IoT
Monitoring of security properties in edge computing
Monitoring of security properties in fog
Monitoring languages
Monitoring Infrastructures

Editor-in-Chief

Prof. Dr. Vittorio M. N. Passaro

Dipartimento di Ingegneria Elettrica e dell'Informazione (Department of Electrical and Information Engineering), Politecnico di Bari, Via Edoardo Orabona n. 4, 70125 Bari, Italy

Message from the Editor-in-Chief

Sensors is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. Sensors organizes Special Issues devoted to specific sensing areas and applications each year.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Ei Compendex, Inspec, Astrophysics Data System, and other databases. **Journal Rank:** JCR - Q2 (*Instruments & Instrumentation*) / CiteScore - Q1
