Message from the Guest Editors

Dear Colleagues,

Electrochemical sensors have been widely used for environmental, chemical, and biological sensing. As we transition into remote health, addressing health disparities and non-contact monitoring, electrochemical sensors will continue to play a pivotal role. In this collection, we seek to feature novel and emerging work that focuses on designing electrochemical sensors with a view on diversity, equity, and inclusion. The approach to electrochemical sensors can be multidisciplinary, from novel material integration with a low cost of ownership to applications for rare diseases to electrochemical sensors that make quality of life more equitable around the globe. This collection seeks to look at electrochemical sensors through addressing Diversity, Equity, and Inclusion with Electrochemical Sensors.

Message from the Editor-in-Chief

Sensors is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. *Sensors* organizes Special Issues devoted to specific sensing areas and applications each year.

Author Benefits

Open Access : free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [MEDLINE](#), [PMC](#), [Ei Compendex](#), [Inspec](#), [Astrophysics Data System](#), and [other databases](#).

Journal Rank: JCR - Q2 (Instruments and Instrumentation) / CiteScore - Q1 (Instrumentation)
