### Message from the Guest Editors

This Special Issue is dedicated to presenting new optical fiber sensors for the measurement of physical and chemical quantities. Contributions on both single sensors and distributed sensing techniques are welcome. New interrogation techniques for handling large arrays of sensors as well as innovative calibration and processing techniques that overcome sensitivity limits, perhaps derived from optical communications, are among the subjects of interest.

- optical fiber sensors
- sensor arrays
- biomedical sensors
- physical sensors
- optical fiber metrology
- distributed optical fiber sensing
- industrial applications of sensors
- detection of chemicals through optical techniques
